He publishes a valuable work on this disease which he sends with a large bottle of his absolute cure, free to any sufferer who may send their P.O. and Express address. MME YALE'S HAIR TONIC

LADIES AND GENTLEMEN: It affords me great pleasure to call the attention of the public to my Yale's Hair Tonic, which is the first and only remedy known to chemistry which positively turns gray hair back to its original color without dye. I personally endorse its action and give the public my solemn guarantee that it has been tested in every conceivable way, and has proved itself the only Hair Specific. It stops hair-falling immediately and creates a luxuriant growth. Contains no injurious ingredient. It is not sticky or greasy; on the contrary, it makes the hair soft, youthful, fluffy, keeps it in curl and removes dandruff. For gentlemen and ladies with hair a little gray, streaked gray, entirely gray and with BALD HEADS, it is specially recommended.

All druggists. Price 5c; also Yale's Skin Food, 5c; Yale's Complexion Cream, 5c; Yale's Face Powder, 5c; Yale's Beauty Soap.

Canaigre in Arizona.

Fowler Bros. are now planting five acres of canaigre as an experiment, says the Phoenix (Ariz.) Gazette, and if this does well they will probably engage extensively in that industry, grow a few thousand acres of this tannin plant and erect suitable works for the reduction of it to tannic acid. While they call it an experiment, from the fact that they have not yet ascertained just how to grow the plant most successfully, it has been well demonstrated that here the weed is indigenous.

They are planting three, two and one foot apart in rows, with a view of ascertaining just how to get the best yield. They are also splitting some of the roots, to see if it will not grow just as well that way. The method of growing canaigre is very similar to that of growing sugar beets. By planting in the early fall harvest comes in early June, before there is a possible shortage of water, thus insuring a full crop each year.

The plant is harvested with a plow. Then the roots are gathered and dried, after which they are ready for shipment, or perhaps the most practical way is to have a reduction plant on the grounds.

It has been but a few years since this plant became well known, but now it is almost certain to supply the world with tannic acid. Only a few days ago a farmer of this valley had a set of harness made, the leather of which was tanned with canaigre. Leather so tanned seems soft and does not harden by being in the hot sun, making a finer harness leather than the usual product.

Four years has developed the canaigre industry until now it bids fair to rank with mining, cattle-growing, fruit-raising and growing alfalfa.
